- Promotes respect, responsibility and positive relationships
- Identifies behaviors that inhibit success

Organizations today are being challenged to do more with less, stimulate creative thinking, work effectively with others and react quickly to the increasing pace of change. Training to address these challenges must focus on tangible, practical skills, which encourage people to embrace change, take risks, communicate and find new ways to solve problems.

Medina County CHALLENGE involves people in a powerful and integrated “learning by doing” approach. Your group will engage in activities and initiatives that encourage critical thinking and risk taking. Through meaningful experience and skillful facilitation, key learnings are transferred to the workplace, school or agency.

Participants in the program learn to solve problems, make decisions, set goals and develop communication skills in an environment that is interactive, challenging, supportive and fun. The environment will stimulate participants to:

- Appreciate individual strengths and weaknesses
- Value and respect individual difference
- Be involved in conflict resolution
- Learn to trust themselves and others

Medina County CHALLENGE will provide each participant the opportunity to acquire and practice essential life skills and to enhance self-esteem.
